

Intermediate Clean Fuel Consultant

Role Type: Full Time

Duration: Permanent

SCV Consulting Ltd. is growing! We are seeking applications for a new team member to help us provide industry-leading sustainability services to our clients. We are looking for someone who is eager, a self-starter, outcome-focused, and is interested in greenhouse gas quantification & verification, circular economy, and life cycle assessments.

Who We Are

SCV Consulting Ltd is a specialized environmental engineering consulting firm that provides professional services in the areas of Carbon Pricing, Air Quality, Sustainability, Climate Change and Environmental Management. Our team of high-performing environmental experts work across Canada and around the world to deliver reliable services to our clients. We are results driven and focused on solving challenging problems for our clients. We help our clients overcome their most pressing challenges - navigating new and complex carbon pricing regulations, climate change adaptation planning, supply chain sustainability assessments, and environmental approvals. When they need us most, our clients count on us to always be on call and ready to help.

The Role

SCV is looking for a motivated individual to join our consulting team as an Intermediate Clean Fuel Consultant. As an Intermediate Clean Fuel Consultant, you will be responsible for conducting consulting and accredited verification services under the Canadian Clean Fuel Regulations (CFR), and similar programs. You will work closely with our clients to ensure compliance with regulatory requirements and provide accurate reporting. You will be expected to prepare proposals, manage projects and liaise with clients. Given the diversity in our portfolio, you will be exposed to a variety of innovative settings, with a self-directed work schedule. The demand for sustainability and environmental services is growing rapidly and SCV offers an opportunity for a motivated individual to accelerate their career in this field.

Key Responsibilities:

- Conduct clean fuel consulting and verifications in the CFR and related programs/markets;
- Conduct life cycle assessments under the CFR and other related clean fuel programs using OpenLCA;
- Conduct GHG quantification and verification of Scopes 1, 2, and 3 GHG inventories;
- Conduct climate change risk assessment and adaptation planning, guiding clients through sustainability strategies, sustainability reporting, and workshops;

- Prepare detailed proposals for projects in clean fuel and GHG quantification and verification, climate change adaptation planning, sustainability, and air quality consulting;
- Regional and potentially international travel for site visits (short term, periodically over the year, <15%)
- Support senior staff with project management;
- Monitor/manage project deadlines, resources, and budgets;
- Prepare technical memos, reports, and presentations for internal client and public facing purposes;
- Provide technical support on complex projects;
- Direct junior staff;
- Support marketing and business development opportunities, and;
- Other tasks and project work as needed.

Who We Look For

- 5+ years of experience in GHG quantification and/or accredited verification;
- Strong understanding of Canadian Clean Fuel Regulations and related regulatory frameworks;
- Experience with, and knowledge of, life cycle assessment (LCA) principles;
- Bachelor's degree in engineering or science, or equivalent experience;
- Strong analytical and problem-solving skills;
- Experience with regulatory and voluntary GHG quantification and verification across Canada and/or internationally (OBPS, EPS, Alberta TIER, GHG Protocol);
- Proficiency with Microsoft Excel handling large datasets and working with complex functions to manage data sets; and,
- Proficiency with Microsoft Word in the context of preparing professional deliverables.

Assets to help your application:

- Business development and marketing experience in the context of environmental engineering, sustainability consulting, climate change management, or carbon pricing;
- Working knowledge of ISO 14065, 14040, and 14044 standards;
- Experience with LCA using variety of modelling software;
- Strong project and client management skills and proven track record of building client relationships;
- History of successfully preparing detailed technical reports for specific audiences; and,
- Prior experience in carbon pricing, decarbonization and carbon footprinting.

What SCV has to Offer:

- Flexible schedule and remote work-from-home structure (must be in Canada);
- Monday to Friday;
- Budget for work-from-home office setup;
- Health benefits package and health spending account;
- RRSP Matching;
- Competitive salary;
- Opportunity to accelerate your career in a small and fast-growing company (<30 employees);
- Growth and mentorship opportunities with a highly qualified team;
- Experience in a rapidly growing field; and,
- Work with industry-leading multinational corporations.

SCV Consulting is proud to be an equal opportunity employer and our inclusive culture leads us to pursue innovation in our field. We invite and encourage applications from all qualified individuals, including from groups that are traditionally underrepresented. Our culture empowers all of us to grow, learn, and succeed.
